(71) Applicant (for all designated States except US): THE WELDING INSTITUTE [GB/GB]; Granta Park, Great Abington, Cambridge CB1 6AL (GB).

(72) Inventors; and

(75) Inventors/Applicants (for US only): DANCE, Bruce, Guy, Irvine [GB/GB]; 46 Metcalfe Road, Cambridge CB4 2DD (GB). KELLAR, Ewen, James, Crawford [GB/GB]; 33 High Street, Linton, Cambridge CB1 6HS (GB).

A1

(54) Title: WORKPIECE STRUCTURE MODIFICATION

(57) Abstract: A method of modifying the structure of workpiece (1) is provided. The method comprises a first step of causing relative movement between a power beam and the workpiece (1) so that a region (3) of the workpiece (1) is melted and the melted material displaced to form a projection (2) at a first location in the region (3) and a hole (4) at a different location in the region. The melted material is then allowed to at least partially solidify after which the first step is repeated one or more times, with the region corresponding to each repeat intersecting the region (3) of the first step.
